

Polycom® SoundStation VTX 1000® Investment Protection You Can Count On

SoundStation VTX 1000 offers many revolutionary benefits, but it is the software upgradeability that provides true, measurable, cost savings and value. With this feature, Polycom is the only company that improves the voice quality as well as enables new solutions to meet your growing communication needs, without having to incur unnecessary expenses by having to purchase a new phone.

Polycom has released *five* new software revisions since the launch of the SoundStation VTX 1000. With each release, we have taken a revolutionary conference phone and made it even better!

Software upgrades have included:

- 1. Integration with Polycom QSX™ – Voice+Content™**
 - *Benefit:* Simple, secure, convenient Voice+Content through your SoundStation VTX 1000. Press a soft key on the console and share a live view of your computer screen with up to 15 other locations. No QSX Content Controller required!
- 2. Direct connection to Polycom Vortex® Installed Room Systems**
 - *Benefit:* Familiar, easy way to control your Vortex installed voice system
- 3. SoundStation VTX 1000 integration with Polycom VSX™ Video Systems**
 - *Benefit:* Simply dial the conference phone to launch a video call, remove the clutter of both a video mic and conference phone on the table, and speak from up to 20 feet away from the mic and still be heard on the far end
- 4. Polycom's Global Management System™ support**
 - *Benefit:* Easily manage and update all of your SoundStation VTX 1000 units in remote locations from one, centralized location
- 5. Enhanced voice quality:** Better narrowband audio quality in noisy room environments, enhanced audio performance in full duplex, improved automatic gain control and wideband audio stability
 - *Benefit:* Life-like voice quality, unmatched by any other conference phone on the market, provides the ultimate in voice conferencing productivity. Our commitment to continuous improvement of an award-winning technology.

Upgrading your SoundStation VTX 1000 software is easy and can be done in less than 15 minutes. You can simply dial a number right from the SoundStation VTX 1000 or use Polycom's Global Management System to update several units at once from a central location.

SoundStation VTX 1000 is your voice collaboration platform of the future. Please contact your Polycom Voice representative, call 1-800-POLYCOM or go to www.polycom.com for more information.
