## Introduction

Polycom visual communications for maximum security environments is enabled by an integrated suite of Polycom hardware devices and software applications that allow you to securely integrate high-quality video conferencing.

For more information about how to use the products supported in this release, please see the respective product documentation. For information on how to securely deploy the products in this solution, see the *Polycom Unified Communications Deployment Guide for Maximum Security Environments* as well as the respective deployment guide for each supported product.

## Polycom Products in this Release

The following Polycom product versions are part of the Wave 3 solution of integrated products designed to deliver a scalable, easily managed video conferencing solution for maximum security environments.

This document provides information for security-conscious customers for the listed products. This software meets the latest U.S. Department of Defense network requirements for listing on the Defense Switched Network (DSN) Approved Products List (APL), as maintained by the Joint Interoperability Test Command (JITC).

Product	Version	Purpose
<b>Systems</b>		
Polycom RMX System 1500/2000/4000	v7.5.0J	Provides MCU conferencing resources.
Polycom DMA System	v 2.1.0J	Virtualizes MCU conferencing resources. Highly recommended for deployments that include two or more Polycom RMX systems.
Polycom CMA System	v 5.2.0J	Enables automatic provisioning of Polycom HDX endpoint systems. Required for remote management of endpoints.
<b>Endpoint Systems</b>		
Polycom HDX Systems	v 2.7.0_J	High-definition video endpoint systems.

## Known Issues

Known issues for this solution are documented in product release notes. Please consult the release notes and documentation for individual products for more information.

## Where to Find Related Documentation

Known issues for this solution are documented in product release notes. Please consult the release notes and documentation for individual products for more information.
